Forecast for Thursday 18 Apr 2024

Weather: Clear skies during the early hours will allow it to turn cold with a frost developing, especially in the valleys. A sunny start to the morning although high cloud gradually turning the sunshine more hazy. Thickening cloud during the afternoon and evening with a chance of a few spots of rain by dusk. Winds freshening later in the day.

Chance of cloud-free hill tops above 600m: 90%.

Low cloud and visibility: Scraps of low cloud are possible around dawn between 300m and 500m. Otherwise cloud free summits with very good visibility. Periods of cloud developing above 700m by sunset bringing some poor or very poor visibilities by the end of the day over the summits.

Meteorologist's View

Despite lighter winds than of late, it will still feel cold for the middle of April. Winds will strengthen later, gusting up to 35 mph over the highest summits by sunset, making it feel like it is below freezing.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 16 Apr 2024	1mm	15.2mm	15.4mm

Forecast for Friday 19 Apr 2024

Weather: Mostly cloudy to begin the day with some patchy hill fog and showers in places. Cloud amounts reducing with sunny intervals soon developing and becoming mainly dry from mid-morning onwards. A fine end to the day with lengthy sunny periods.

Maximum wind: Northwesterly 25 mph gusting 35 mph, easing later.

Chance of cloud-free hill tops above 600m: 60% becoming 90%.

Low cloud and visibility: Periods of cloud above 500m until mid-morning, then patchy cloud above 800m until mid-afternoon but all summits free of cloud by the evening. Excellent visibility below the cloud with superb air clarity. Locally very poor in the cloud.

Temperature: **Valleys:** Plus 5 Celsius rising to plus 14 Celsius.
At 600m: Plus 4 Celsius rising to plus 10 Celsius.
Freezing level: Above the summits.
